ECODEPUR® SBR

Ecodepur® SBR are a Compact System specialized in domestic wastewater treatment in one Biological reactor by Sequence Batch Reactor (SBR) in an Activated Sludge process.

FEATURES

- > Automatical Sequential function - BATCH System;
- > Activated Sludge process, in low-loaded/total aeration system (total oxidation);
- > Constructed in Polyethylene tank or Steel Tank;
- > High treatment levels;
- > Null visual impact (Underground Installation);
- > Easiness and speed of installation;
- > Manufactured in additive linear polyethylene anti-UV, by rotomoulding system, which confer elevated mechanical resistance and insensitivity to corrosion;
- > Absence of unpleasant odours;
- > Functioning and maintenance simplicity;
- > Aeration and agitation secured by only component in high profit conditions;
- > Automatic functioning (electric board with integrated delayer);

OPERATION

Ecodepur® SBR operates in a true batch mode with aeration and sludge settlement both occurring in the same reactor.

APPLICATION

- > Small population clusters;
- > Condominiums;
- > Tourist complexes;
- > Service Stations;
- > Restaurants;
- > Construction sites;
- > Schools;
- > Athletic complexes;
- > Camping;
- > Component maid of wastewater produced in industrial unities, between others.

MAINTENANCE

The treatment unity simplicity, allied to its automatic functioning allows restricting its maintenance to a set of routine operations which frequency will be dictated by the normal exploration practice.
